*Photography by Lynn Karlin*

Lynn Karlin is the master of garden photographers. Here, on these pages, we are treated to the harvest, that short, sweet season where we feast with our eyes and palate. Karlin's work is as rich with symbolism as it is with color: The fleeting quality of just ripe fruit is juxtaposed with surfaces that record the life of those who tilled the soil. In these and many other of her images, the circle of life is represented within each frame.
